## ISOPHRIN

TRADE MARK REG. CALIF.

*A non-irritating Neo-Synephrin Solution  
used as a nasal spray or drops*

ISOPHRIN is 1/4% levo-meta-methylamino-  
ethanolphenol hydrochloride,  $C_9H_{13}O_2N.HCl$   
in a special isotonic solution prepared only  
by Broemmel's.

A synthetic substance of epinephrine-like  
action, but possesses the advantage that it  
is more stable, its effects are prolonged and  
it does not irritate the nasal mucosa or  
cause sneezing.

Prolonged contact with certain metals  
may cause discoloration, therefore use  
spray bottles with only glass or hard rubber  
fittings.

Supplied in original bottles of 1 oz.

President, John N. Chain, Fourth and E Streets, Eureka.  
Secretary, Joseph S. Woolford, 350 E Street, Eureka.  
Meeting, *First Thursday.*

**Imperial County Medical Society**  
President, William A. Clarke, Holtville.  
Secretary, Claude F. Peters, 722 Main Street, Brawley.  
Meeting, *Third Tuesday, 7:00 p. m., Barbara Worth Hotel, El Centro.*

**Inyo-Mono County Medical Society**  
President, Lloyd S. Bambauer, 705 Home Street, Bishop.  
Secretary, Clarence L. Scott, 609 Elm Street, Bishop.  
Meeting, *Fourth Wednesday, Methodist Church, Bishop, except December, January, February.*

**Kern County Medical Society**  
President, C. S. Compton, 428 C Street, Bakersfield.  
Secretary, Eric F. Colby, Hopkins Building, Bakersfield.  
Meeting, *Third Thursday, 8:00 p. m.*

**Kings County Medical Society**  
President, P. K. Edmunds, Corcoran.  
Secretary, William A. Johnstone, Hanford.  
Meeting, *Second Monday, 8:00 p. m., Legion Hall, Hanford.*

**Lassen-Plumas-Modoc County Medical Society**  
President, W. B. McKnight, Portola.  
Secretary, Bernard S. Holm, Quincy.  
Meeting, *On Call.*

**Los Angeles County Medical Association**  
1925 Wilshire Boulevard, Los Angeles  
President, Roy E. Thomas, 1136 W. Sixth Street, Los Angeles.  
Secretary, L. A. Alesan, 1925 Wilshire Boulevard, Los Angeles.  
Meetings, *First and Third Thursdays, 1925 Wilshire Boulevard, Los Angeles.*

**Marin County Medical Society**  
President, Harry N. Hensler, Home Market Building, San Anselmo.  
Secretary, Carl W. Clark, 510 B Street, San Rafael.  
Meeting, *Fourth Thursday, 7:00 p. m., Marin Golf and Country Club.*

**Mendocino-Lake County Medical Society**  
President, Dallas L. Wagner, 615 Main Street, Fort Bragg.  
Secretary, Royal Scudder, Fort Bragg.  
Meeting, *On Call.*

**Merced County Medical Society**  
President, William E. Fountain, 557 Seventeenth Street, Merced.  
Secretary, James A. Parker, Bank of America Building, Merced.  
Meeting, *Third Thursday, Hotel Tioga, Merced.*

**Monterey County Medical Society**  
President, Mast Wolfson, 215 Franklin Street, Monterey.  
Secretary, Arnold Manor, 215 Franklin Street, Monterey.  
Meeting, *First Thursday.*

**Napa County Medical Society**  
President, Frank X. McGreane, Silverado Sanatorium, Calistoga.  
Secretary, M. M. Booth, Bruck Building, St. Helena.  
Meeting, *First Wednesday.*

**Orange County Medical Society**  
President, John A. Wood, 605 No. Los Angeles Street, Anaheim.  
Secretary, Glenn Curtis, 323 North Pomona Street, Brea.  
Meeting, *First Tuesday, 8:00 p. m., Chapel of the Orange County Hospital, Orange.*

**Placer County Medical Society**  
President, William M. Miller, Auburn.  
Secretary, Robert A. Peers, Colfax.  
Meeting, *At Call of President.*

**Riverside County Medical Society**  
President, Thomas A. Card, 3616 Main Street, Riverside.  
Secretary, W. Philip Corr, 3616 Main Street, Riverside.  
Meeting, *Second Monday, 8:00 p. m., Library, Riverside Community Hospital.*

**Sacramento Society for Medical Improvement**  
President, Norris R. Jones, M. D., 1127 Eleventh Street, Sacramento.  
Secretary, Glenn E. Millar, 321 Physicians Building, Sacramento.  
Meeting, *Third Tuesday, 8:30 p. m., Auditorium, Sacramento.*

**San Benito County Medical Society**  
President, J. M. O'Donnell, Hollister.  
Secretary, L. E. Smith, Hollister.  
Meeting, *At Call of President.*

### Nonprofit Hospitalization Corporations

In California, the three nonprofit hospitalization corporations named below are in operation:

Associated Hospital Service of Southern California, 1151 South Broadway, Los Angeles.

Insurance Association of Approved Hospitals, 369 Pine Street, San Francisco; 675 East Santa Clara, San Jose; Easton Building, Oakland.

Intercoast Hospitalization Insurance Association, 1127 "J" Street, Sacramento.

**Gall-Bladder in Heart Disease.**—Disease of the gall-bladder is definitely associated with disease of the arteries of the muscles of the heart and contributes to death from the latter ailment, Herbert S. Breyfogle, M. D., Kansas City, Mo., reports in *The Journal of the American Medical Association*.

Its coexistence and the part it plays in causing death of patients with the heart disease was determined by the Missouri physician by analyzing 1,493 consecutive autopsy records. In these records he found 162 cases in which the primary cause of death was considered to be in the heart disease, but on further study seventy-nine of these cases were found to have associated gall-bladder disease (gall-stones and other disorders of this organ).

In the 1,493 autopsy records gall-bladder disease was mentioned in 363 cases, including the seventy-nine with the heart disease. Gall-bladder disease was associated with the heart disease in 42.4 per cent of the 162 cases and the heart ailment was present in about 20 per cent of the 363 cases of disease of the gall-bladder.

# SILVER PICRATE

*Wyeth*

**HAS SHOWN A CONVINCING RECORD\* OF  
EFFECTIVENESS IN ACUTE ANTERIOR URETHRITIS**

**due to *Neisseria gonorrhoeae* • *Trichomonas vaginalis*  
*Monilia albicans***

Silver Picrate is a crystalline compound of silver in definite chemical combination with picric acid. Dosage form for use in anterior urethritis: Wyeth's Silver Picrate Crystals in an aqueous solution of 0.5 percent.

*Supplied at all pharmacies in vials of 2 grams*

Complete literature on Silver Picrate as used in genitourinary and gynecological practice will be mailed on request.

\*"Treatment of Acute Anterior Urethritis with Silver Picrate," Knight and Shelanski, *AMERICAN JOURNAL OF SYPHILIS, GONORRHEA AND VENEREAL DISEASES*, Vol. 23, No. 2, pages 201-206, March, 1939.

**JOHN WYETH & BROTHER, INCORPORATED, PHILADELPHIA, PA.**

**Science and Sal Hepatica.**—"If you listen to Fred Allen on Wednesday nights—and apparently a good many people do—you will hear his announcer make some comments about the scientific research conducted by leading medical magazines which indicate that a high percentage of doctors always prescribe a saline laxative when treating a common cold," *The Journal of the American Medical Association* says in an editorial.

"Of course the names of the leading medical magazines are not given; yet it would not be hard to guess the name of the commercial publication that conducted this survey for the Bristol-Myers Company.

"Part of the scientific story is the claim that Sal Hepatica is the 'mineral salt laxative that does two things, not just one; it rids the body of waste and it also combats acidity.' The history of Sal Hepatica is a strange commentary on the kind of science that used to be sold to credulous Americans. In 1911 Sal Hepatica was advertised as a uric acid solvent, said to be indicated in stomach, liver and kidney disorders, and especially beneficial in rheumatism and gout. In 1916 it was promoted because it was said to be useful in the treatment of pyorrhea. By 1929 it was called the American equivalent of European spas, and listeners were told that it was good also for headaches, colds, rheumatism and autointoxication. Actually there is nothing to Sal Hepatica according to recent analyses except Glauber's salt, baking soda and tartaric acid, common salt, sodium phosphate, a trace of lithium phosphate and water. Any doctor knows what that is good for and also a wide variety of conditions which it is not good for.

"Quite recently Sal Hepatica has gone exceedingly high hat. In an advertisement in *Drug Topics* the druggists are told that 'scientific research on Sal Hepatica never relaxes; research men continually put it through its laboratory and

## MEDICAL SCHOOL AND HOSPITAL

(Organized 1881)

*(The Pioneer Post-Graduate Medical Institution in America)*

### For the General Surgeon

A combined surgical course comprising general surgery, traumatic surgery, abdominal surgery, gastro-enterology, proctology, gynecological surgery, urological surgery. Attendance at lectures, witnessing operations, examination of patients pre-operatively and post-operatively, and follow-up in the wards post-operatively. Pathology, roentgenology, physical therapy. Cadaver demonstrations in surgical anatomy, thoracic surgery, regional anesthesia. Operative surgery and operative gynecology on the cadaver.

For Information Address: MEDICAL EXECUTIVE OFFICER, 345 West 50th Street, New York City

### PLASTIC REPARATIVE SURGERY

The course comprises examination of patients; tests, models, and photographs; diagnosis and selection of method of correction; the properties of various orders of skin grafts and variance in their application; bone, cartilage and nerve grafts; readjustments and replacements; fresh wound treatment; pre-operative care; anesthesia; operative procedures; wound closing and minimum scar; follow-up and infection problems; keloids. The course covers the field of correction of disfigurements and replacement of traumatic loss and congenital deficiency. Exposition of cases, lectures and cadaver demonstrations.

best described in the word that the company features in its latest advertisement. Bristol-Myers found a word for it, and that word is 'feto.'

**Sulfanilamide Should Be Administered with Caution During Pregnancy.**—It is concluded from studies made at Johns Hopkins Hospital that until the effects of sulfanilamide on the human fetus or unborn child are better known the drug should be administered with extreme caution during pregnancy, *The Journal of the American Medical Association* warns.

"The necessary observations in human beings should include a careful study of intra-uterine (inside the womb) development, birth weight and postnatal (following birth) growth in the infants born to mothers receiving extended sulfanilamide treatment during pregnancy," *The Journal* says.

"Using rats in carefully controlled experiments, Harold Speert has recently reported observations on the placental transmission (from the mother to the unborn child) of sulfanilamide. He found that administration of this drug to rats throughout gestation (pregnancy) results in the appearance of sulfanilamide in approximately equal concentrations in the blood streams of both mother and fetus. Prolonged administration of sulfanilamide to pregnant rats produces deleterious effects in the offspring, including increased intra-uterine and postnatal (after birth) mortality, decreased litter size, diminished birth weight and selective stunting of growth."

Health is so necessary to all the duties as well as pleasures of life, that the crime of squandering it is equally to the folly.—Johnson.

**No Royal Road Exists to Management of Arthritis, Physicians Declare.**—"There is no royal road to the successful management of arthritis," H. M. Margolis, M. D., and V. W. Eisenstein, M. D., Pittsburgh, declare in an evaluation of the use of several so-called "specific" treatments, published in *The Journal of the American Medical Association*.

An analysis of the replies to a questionnaire, made by ninety-two physicians from all parts of the United States who are particularly interested in rheumatic disease, led the authors to conclude that a broad and comprehensive program of treatment is still the foundation for successful management of this condition.

At present the use of gold salts appears to be the most promising addition to the treatment. However, the possibility of dangerous reactions warrants extreme care in the use of this drug.

"Sulfur treatment is both without rationale and without effect," the authors state. "Vaccines are apparently losing hold. Although their employment results in 'benefit' in a proportion of cases, such results are attributable not to any specific effect of the vaccine but apparently to the psychologic effect of the injection.

"Results from fever treatment are only transitory, and even these are obtained in such a small proportion of cases treated that this form of treatment cannot assume any place of importance. The risks involved, as well as the technical difficulties entailed, far outweigh any modicum of benefit that might be expected. The use of sulfanilamide is unanimously condemned.

"These measures have in the main been difficult to evaluate. One reason for this difficulty is the lack of control studies by those initiating a new form of treatment in arthritis. The fact that rheumatoid arthritis may be a self-limited disease, certainly one subject to spontaneous remissions, further complicates any individual physician's efforts to achieve balanced judgment with regard to the use of new drugs."

Coronary thrombosis is that rather common accident in which a clot has shut off the blood supply to the heart.

## BOOK REVIEWS

**Directory of Medical Specialists Certified by American Boards, 1939.** By Paul Titus, M.D., Directing Editor. Cloth. Pp. 1573. New York: Columbia University Press, 1940.

This, the only official directory of its kind, lists approximately 14,400 diplomates certified by the twelve special American boards and one of the two affiliate boards.

A separate section is devoted to each American board, with both a geographic and a biographic listing of its diplomates. In addition, there is a complete alphabetic list of all the 14,400 diplomates. In this list there are addresses and indications of specialty certification, while in the geographic sections complete biographic information is given. The organization and examination requirements of each of the American boards are explained in full.

All these features make the Directory unique and invaluable to doctors (specialists or general practitioners), hospitals, social agencies, libraries, medical societies, business organizations, etc. It will help hospital officials pass on the ability of candidates for staff positions. It will provide medical society officers with authoritative lists. Family

physicians can form an accurate judgment of the qualifications and ability of specialists in any branch of medicine for the benefit of patients. In short, it has so many practical uses that it is certain to be an indispensable reference tool for thousands of individuals and organizations.

**Principles of Chemistry.** An Introductory Textbook of Inorganic and Physiological Chemistry for Nurses and Students of Home Economics and Applied Chemistry. With Laboratory Experiments. By Joseph H. Roe, Ph.D., Professor of Biochemistry, School of Medicine, George Washington University. Fifth Edition. Cloth. Pp. 503, illustrated. Price, \$3. St. Louis: The C. V. Mosby Company, 1939.

This is an interesting and well-presented textbook on the subject of chemistry, put out primarily for nurses. It is easy to read and gives late information on the matter of vitamins and endocrines, in addition to the fundamentals of inorganic and biochemistry. The experiments are well conceived to familiarize the student with the simpler chemical facts and laws.—Philip Corr.

**The American Illustrated Medical Dictionary.** A complete Dictionary of the terms used in Medicine, Surgery, Dentistry, Pharmacy, Chemistry, Nursing, Veterinary Science, Biology, Medical Biography, etc. By W. A. Newman Dorland, A.M., M.D., F.A.C.S., Lieutenant-Colonel, M. R. C., United States Army; Member of the Committee on Nomenclature and Classification of Diseases of the American Medical Association; Editor of the "American Pocket Medical Dictionary." With the collaboration of E. C. L. Miller, M.D., Medical College of Virginia. Eighteenth edition, revised and enlarged. 1607 pages, with 942 illustrations, including 283 portraits. Flexible and stiff binding. Philadelphia and London: W. B. Saunders Company, 1938. Plain, \$7 net. Thumb Indexed, \$7.50 net.

Among distinctive features to which attention may be called are the anatomical tables; the chemical formulas; tables of dosage; and the exanthemata and other phases

## BOOK REVIEWS

(Continued from Page 20)

of medicine, concerning which physicians have interest. There are many illustrations. All in all, this last edition of the American Illustrated Dictionary measures up to the best standard of books of this type, while the repeated editions are an evidence of the popularity of this dictionary.

**Anesthesia: Narcosis, Local, Regional, Spinal.** By A. M. Dogliotti, M.D., Professor of Surgery, University of Modena. Authorized English Translation by Carlo S. Scuderi, M.S., M.D., F.A.C.S., Associate in Surgery, University of Illinois, College of Medicine. Cloth. Pp. 680, with 17 tables and 236 illustrations partly in colors. Price, \$7.50. Chicago: S. B. Debour, Publishers, 1939.

This is a book for the specialist or for the surgeon with a good basic knowledge of the subject. It is packed with good hints, and is well worth a careful perusal. However, the book is also full of misinformation, such as this statement regarding humidity control: "It is much more simple to humidify the anesthetic apparatus. This is easily done by having the gas go through a flask containing water or a chamber which contains a humid sponge or, easier still, by adding a little water to the respiratory bag."

The chapters on the history of anesthesia, on the physiology of pain and the physiopathology of narcosis show the influence of the Rome-Berlin axis, credit for ideas and discoveries being given to Italian or German workers wherever there is the slightest excuse.

There is an interesting and useful chapter on accidents and complications of narcosis. The sections on nitrous oxid, ethylene, and cyclopropane are very sketchy, more space being given for the discussion of avertin anesthesia than for ethylene and cyclopropane combined.

Over half the book is devoted to the discussion of peripheral anesthesia, and it is this part which bears the marks of being based on the author's own deep thought and experimentation. The section covering epidural anesthesia is particularly valuable, since the author himself is largely responsible for the widespread interest in, and the increased use of this form of anesthesia in recent years.

All in all, the book should be bought and read by every anesthetist, and by others having special interest in the subject. It cannot be recommended, however, to the student or interne, containing as it does too much chaff along with the good grain.—W. L. Garth.

**Medicolegal Phases of Occupational Diseases.** An Outline of Theory and Practice. By C. O. Sappington, A.B., M.D., Dr. P.H., Consultant, Occupational Diseases and Industrial Hygiene. Formerly Director of Industrial Health, National Safety Council; also Special Lecturer on Industrial Hygiene and Occupational Diseases, University of California, Stanford Medical School, University of Michigan, University of Illinois Medical School, and Rush Medical School. Cloth. Pp. 405. Chicago: Industrial Health Book Company, 1939.

A monograph of the medicolegal problems of occupational disease, including the measurement and evaluation of industrial exposure; interpretation and application of information relating to physical examinations, diagnosis, clinical laboratory work, and x-ray findings; the correlation of industrial and medical information in terms of cause-and-effect relationship; occupational disease legislation by States; and review of cases with decisions.

A valuable working outline for anyone dealing with occupational diseases, and an excellent reference book for the individual who has an occasional actual or questionable case of occupational disease. A cover-to-cover reading of this book should enable the average physician to handle cases of occupational diseases along the lines of the expert.—Joseph J. O'Hara.

**John Howard. (1726-1790.) Hospital and Prison Reformer:** A Bibliography. By Leone Baumgartner, M.D., Ph.D., with introduction by Arnold M. Muirhead, M.A., Oxon. Board, Pp. 79. Price, \$1. Baltimore: The Johns Hopkins Press, 1939.

For those who are keenly interested in studying the very beginnings of the prison and hospital reform movement, this volume will be of prime interest and value. Doctor

## BOOK REVIEWS

(Continued from Page 22)

Baumgartner has succeeded in tracing all the available works and writings of John Howard, the great hospital and prison reformer of England, and presents them herewith for the student in one complete bibliography. The first part of the book is taken up with a short summary of John Howard's life by Arnold Muirhead.

The death of his wealthy father left Howard with funds which were sufficient to enable him to travel. Captured by a French privateer, he was made a prisoner, and thus obtained first-hand knowledge of the treatment of those in chains. No doubt this personal experience gave him the interest he later exhibited for the study of prison conditions and their reform. His opportunity came in 1773 when he was appointed High Sheriff of Bedfordshire. He found that prisoners acquitted at the Assizes were brought back to jail for failure to pay their jailers for their custodial care. He tried to abolish the fee system for paying jailers, and give them a salary; and to find a precedent for this novel request, he traveled, visiting practically all the prisons in England. He made seven tours abroad on the Continent, going into all countries and jails. As he traveled, he observed and wrote. By 1784 he had covered 40,000 miles in search of facts.

Howard constantly risked his life, so zealous was he to get to the truth. He visited the chief lazarettos in Europe, and took passage on ships with a "foul bill" to learn quarantine regulations. Everywhere he found lack of sanitation, drinking and gambling in prisons encouraged by keepers, no medical care for inmates, lack of segregation of cases, and decayed prison buildings.

He spent a considerable amount of money pursuing his researches, going back to prisons he had previously examined to note any changes, and published his results. His writings stirred public opinion and stimulated others to carry on this work of reform. As a result, Parliament passed laws for the betterment of prisoners. His influence founded the Howard Society for Prison Reform, which has a long record of achievement to its name, and he was given the thanks of the House of Commons in a public appearance. His works were translated into other languages, and

## BOOK REVIEWS

(Continued from Preceding Page)

thereby his influence in the cause of sanitation and hospital and prison administration was an important link in the modern public-health movement.—Reuben L. Kaufman.

**The Art of Anesthesia.** By Paluel J. Flagg, M. D., Visiting Anesthetist to Manhattan Eye and Ear Hospital; Consulting Anesthetist to St. Vincent's Hospital, New York; Consulting Anesthetist to the Woman's Hospital, Sea View Hospital, Jamaica Hospital, Mount Vernon Hospital, Flushing Hospital, Mary Immaculate Hospital, and St. Mary's Hospital, Far Rockaway, New York; Nassau Hospital, Long Island; Director of Pneumatology, World's Fair, New York City, and Chairman of Committee on Asphyxia of the American Medical Association. Sixth edition, revised. Cloth. Pp. 491, with 161 illustrations. Philadelphia: J. B. Lippincott Company, 1939.

Doctor Flagg has made many additions in this edition, and the volume is presented by the author as a groundwork in acquiring more comprehensive knowledge of the art of anesthesia. A brief historical background is given. Before specific agents are discussed, he deals with "Complete General Anesthesia," considering induction, maintenance, recovery, position on table, and signs of anesthesia. Each agent is taken up separately and fully. Local and regional techniques are given consideration.

The new material describes cyclopropane anesthesia and CO<sub>2</sub> absorption, use of helium and methods of resuscitation, as well as newer drugs, used as premedication and basal anesthetic agents and technique.

Intubation and difficulties in attaining skill in the art are fully outlined. A chapter on causes of death in anesthesia and resuscitation of the new-born is included.

Doctor Flagg suggests a department of pneumatology which would include the field of anesthesia and gas therapy.

A very useful reference for the experienced anesthetist, and extremely valuable as a guide to the novice.—Harry J. Smith.

### BOOK REVIEWS

(Continued from Page 26)

**Forensic Medicine.** By Sydney Smith, M. D. (Edinburgh), F.R.C.P. (Edinburgh), D.P.H., Regius Professor of Forensic Medicine, University of Edinburgh; Formerly Principal Medicolegal Expert and Director of Medicolegal Section, Egyptian Government Service, and Professor of Forensic Medicine, University of Egypt; Formerly Medical Officer of Health, Department of Public Health, New Zealand, and Examiner in Public Health to the University of New Zealand. Including a section on American Medicolegal Procedure by Alan P. Moritz, B.Sc., M.A., M.D., Professor of Legal Medicine, Harvard University School of Medicine. Sixth edition. Cloth. Pp. 654, with 169 illustrations. Price, \$7. Boston: Little, Brown & Company, 1939.

This is an American edition of a British work, and reflects, in the main, English and Scotch law; but there is included a very practical section of American medicolegal procedures. The book stresses physical findings and macroscopic pathology, but there is a short, practical classification of insanity, in which one finds a modern consideration of the part played by alcohol in traffic accidents. In the section devoted to toxicology, the symptoms and post-mortem findings are set down in a very practical way; but the portion devoted to chemical procedures is very brief, and the book, therefore, is not a practical reference for those doing toxicology. The book can be recommended, however, for all desiring to familiarize themselves with the general principles of forensic medicine, rather than as a reference for workers in any of the special fields.

**The Early Symptoms of Renal Tuberculosis** are not appreciated, and genito-urinary tuberculosis is regarded as a disease by itself and not as a manifestation of a generalized tuberculosis condition. As a result, adequate convalescence and expert after-care are not insisted upon. Sanatorium treatment and continued supervision after operation or local treatment will favorably influence the general prognosis.—J. Carver, M. D., *Tubercle*, April, 1939.

### TWENTY-FIVE YEARS AGO

cants to the office of the State Society for investigation and report. Membership in county units is becoming more and more valuable and important; as the medical law is broken down, from legislature to legislature, membership in a recognized medical organization of high standing will become more necessary and more valuable. . . .

*Importance of Case Records.*—This brings up the whole matter of case records and their vital importance. Too many physicians are very, very careless in the matter of keeping case records of their patients. Memory is a jade and an utterly unreliable one. . . . Whenever possible, every surgical procedure should be a matter of consultation, and a record should be kept of that fact. You can never tell when the most unlikely appearing patient may turn around and sue you. . . . By all means think of your records; keep them sufficiently full; do not be careless and slovenly about this, and so run the chance of being put to a good deal of trouble and expense; for if you are sued it will take a good deal of your time, and that is an expense to you, to say nothing about placing an added burden on all the members of the society just through your own fault. Keep your case records carefully.

*From an Original Article on "General Paresis and Its Relation to Syphilis, with a Report of the Pathologist of Napa State Hospital," by A. W. Hoisholt, M. D., Napa.*—General paresis, general paralysis of the insane or softening of the brain was first spoken of by Willis in 1672, but was not recognized and described as a disease entity until 1822,

## EDITORIALS†

### SIXTY-NINTH ANNUAL SESSION: CORONADO, MAY 6-9

**Annual Session Proceedings Will Appear in June Issue.**—Much of the preliminary story of this year's annual session of the California Medical Association has already been given in the "Pre-Convention Bulletin" supplement to the April number of CALIFORNIA AND WESTERN MEDICINE. Since, therefore, the current issue will be placed in the mails when the meetings at Coronado are still in progress, the record of proceedings of the annual session, both in relation to the scientific assemblies (general and section meetings, scientific exhibits, and medical films) and organization or business activities (House of Delegates and Council meetings), must lie over for the June issue of the OFFICIAL JOURNAL. In the meantime, returning delegates and visitors will be able to make their oral reports to component societies.

\* \* \*

**Increasing Activities Necessitate a Larger "Pre-Convention Bulletin."**—Members may have noted that the "Annual Session Program—Pre-Convention Bulletin" supplement was of larger size this year, consisting of ninety-two pages; the OFFICIAL JOURNAL proper containing only fifty-two pages of text. To some members, so large an allocation of space for a discussion of activities and policies may seem unwarranted; but such judgment must be changed if it be agreed that the story of the needs of organized and scientific medicine should be made available to each of the more than six thousand physicians who make up the California Medical Association membership. Nor should it be forgotten that, today, it is the practice of scientific medicine that is being assailed; mostly, it is true, by theorizing agencies and individuals from without the medical profession, but, nevertheless, with powerful effect and to the detriment of the prestige of the medical profession. In recent years there has never been a time when scientific medicine has so much needed the support of organized medicine than at the very present. There is ample reason, therefore, for bringing the many reports that were given place in the "Pre-Convention Bulletin" to the attention of State Association members.

† Editorials on subjects of scientific and clinical interest, contributed by members of the California Medical Association, are printed in the Editorial Comment column which follows.

### Bequest Forms: Unto the California Medical Association\*
